

Chapter 1: Introduction

Para one: Basic Intro and background of the work

Para two: Importance of your work

Para Three: Organization of the work

Chapter 2: Related Works (single para)

Chapter 3: Proposed Method

(explain the whole work here , HOW IT WORKS, in multiple paragraphs(where necessary) with figures and tables)

Chapter 4: Experimental Results and Analysis

(explain the results of the work, their formula, and how did you calculate with necessary tables.)

Chapter 5: Conclusion and Future works

(briefly summarize the work and mention some limitations and explain what will you do to upgrade the work)

Always use Present tense (Mostly Present Simple and Present Participle) . For example, instead of “ we then calculated..... “ use “The system/model then calculates....”
